

First BANGOR-SPIE Graduate Student Seminar Series

Fall 2013

Please meet us for a discussion on current research topics provided by Bangor University SPIE Students:

Nov 6th- Robert Wanat: "Image appearance modeling for dark displays"

Nov 13th -Douglas Winter: "Study of polymer composites by synchrotron techniques"

Nov 20th- Zubaida Abdul Sattar- "A step towards the design for the self consistent design of a semiconductor nanolaser"

Nov 27th -Daniel Roberts-"Modelling of edge-emitting lasers"

Dec 4th -Laurel Hopkins-: "In situ Cathodoluminescence of GaN: a transistor model to explain charging effects"

Dec 11th: Huw Waters- "Accelerated Organic Photo-Voltaics lifetime studies"

Seminars will take place at 3pm on lecture room 211. All members of the Bangor University community welcome,
